ENERGY & INVESTMENT LTD.

COMPANY PROFILE

OUR VISION

Empowering the future through sustainable energy solutions, our vision at **GreenDiamondEnergyInvestmentLimited** is to be the global leader in the oil and gas industry. By leveraging innovation, advanced technology, and a commitment to environmental stewardship, we aim to drive progress while ensuring the well-being of our planet and communities. Our vision is to be at the forefront of shaping a cleaner, more efficient energy landscape, delivering value to our stakeholders and contributing to a brighter, more sustainable future for generations to come.

OUR MISSION

To responsibly explore, extract, and deliver energy resources to meet the world's growing demand while prioritizing safety, sustainability, and community engagement. We are committed to operational excellence, innovation, and ethical practices as we strive to be a leader in the oil and gas industry, contributing positively to the global energy landscape and fostering economic growth in the regions we operate

OUR VALUES

- Excellence
- Professionalism
- Innovation
- Corporate Social Responsibility
- Transparency
- Integrity
- Teamwork

ABOUT US

At **GreenDiamondEnergyInvestmentLimited**, we are at the forefront of the global energy landscape, driving innovation and excellence in the exploration, production, logistics and distribution of oil and gas resources. With a rich heritage and a commitment to sustainability, safety, and efficiency, we stand as a beacon of reliability and progress in the dynamic realm of energy.

We are more than an oil and gas company, we are pioneers, innovators, and stewards of the society's energy resources. With a legacy of excellence and a vision for the future, we are committed to shaping the energy landscape for generations to come. Join us on our journey as we power progress and build a brighter, more sustainable future for all.

SERVICES

Upstream & Downstream

Exploration Distribution

Logistics

Environmental Management

Civil/Electrical Engineering

Chemical Products

General Services

SERVICES

UPSTREAM

A. Provision Of Drilling Services

1. Drilling Rigs
2. Drilling Fluids
3. Production Chemicals
4. Waste Management Control And Equipments

B. Mechanical Construction

1. Fabrication services

C. Asset Integrity Management

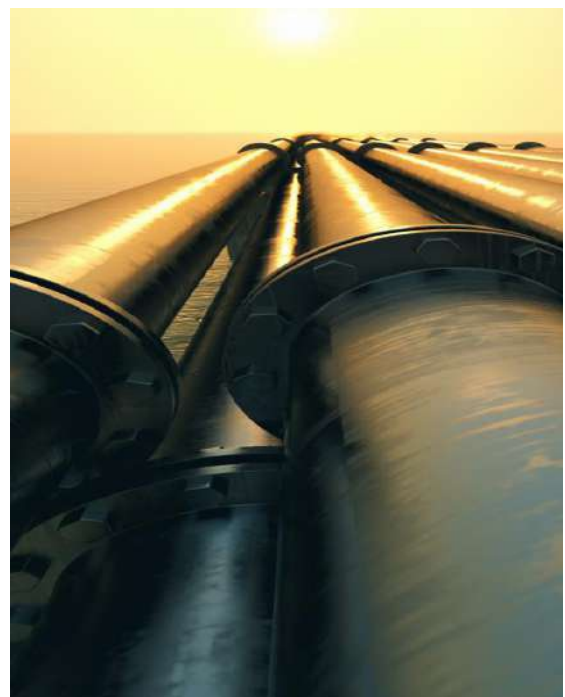

1. Pipelines Services and Monitoring

D. Equipment Leasing

1. Heavy duty equipments
2. Earth moving equipments
3. Vehicles

E. Strategic Procurement

1. Cost-effective and efficient solutions that ensure our clients experience significant cost savings
2. Relationships with Original Equipment Manufacturers

DOWN STREAM

Marketing, Supply & Trading.

This business unit is responsible for the supply and trading of crude and petroleum products in partnership with the Nigerian National Petroleum Corporation.

Products traded include, Premium Motor Spirit (PMS), Automotive Gas Oil (AGO also known as Diesel), Dual Purpose Kerosene (DPK), Liquefied Petroleum Gas (LPG also known as Natural Cooking Gas), Aviation Turbine Kerosene (ATK), Low Pour Fuel Oil (LPFO).

The downstream sector operations cover crude oil conversion into refined and petrochemical products and finer chemicals, and gas treatment as well as transportation and marketing of the petroleum products.

EXPLORATION & PRODUCTION

We believe in technical excellence, we would rather not do something than do something less than excellent.

We believe in the involvement of Government Agencies and the people where we operate, our goal is to make everyone part of the solution.

Our teams of experts include:

- a. Exploration / Development Team
- b. Drilling Team
- c. Production Team
- d. Facilities Team
- e. Infrastructure / Installation Team

LOGISTICS

Oil & Gas logistics require experienced, dedicated services, with full understanding of logistical challenges such as extreme weather conditions and remote inhospitable locations. **GreenDiamondEnergy&InvestmentLimited** is an acclaimed specialist in the Oil and Gas industry (managing upstream and downstream), with experience in providing a complete range of onshore and offshore services to the Oil & Gas industry.

With an exclusive combination of expert staff in shipping, logistics and offshore marine services we can adapt to the dynamics of each assignment and offer tailor made services and round the clock support to ensure your shipments are delivered to the right destination in a safe and timely manner.

Ability to provide full support to global players in the Oil & Gas industry Range of world class and cost-effective Sea and Road solutions to the most remote oil fields across the nation. We are recognized for offering unmatched solutions.

Full support for handling dangerous goods
Supported by a team of highly trained and professional personnel.

Driving Sustainable Energy Solutions

At **GreenDiamondEnergy&InvestmentLimited**, we are more than Oil and Gas company, we are catalysts for change. By embracing innovation, sustainability, and responsible stewardship, we are shaping the future of energy. Join us as we continue to push the boundaries of production, Logistics oil & gas, powering progress and prosperity for generations to come.

ENVIRONMENTAL MANAGEMENT.

We provides a range of services aimed at assessing, monitoring, mitigating, and managing environmental impacts associated with various human activities, industries, and development projects. These services typically include:

Environmental Impact Assessments (EIAs): Conducting studies to evaluate the potential environmental effects of proposed projects or developments before they are undertaken. This helps in identifying potential risks and developing strategies to mitigate them.

Environmental Compliance: Assisting clients in understanding and complying with environmental regulations and permits issued by regulatory agencies.

Pollution Control and Remediation: Developing and implementing strategies to control pollution, such as air emissions, water discharges, and soil contamination. This involve designing and installing pollution control systems, conducting remediation activities, and managing hazardous waste.

Environmental Monitoring and Testing: Conducting regular monitoring and testing of air, water, soil, and other environmental media to assess the impact of human activities and ensure compliance with regulatory standards.

Sustainable Development Planning: Assisting clients in incorporating environmental considerations into their development plans and practices to promote sustainable and responsible growth. This involve advising on resource conservation, energy ef?iciency, and waste reduction strategies.

Environmental Management Systems (EMS): Developing and implementing EMS frameworks to help organizations effectively manage their environmental impacts and improve their environmental performance over time..

Environmental Training and Education: Providing training and education programs to help clients and their employees understand environmental issues, regulations, and best practices. It include workshops, seminars, and online courses tailored to speci?ic industry needs.

CIVIL/ELECTRICAL ENGINEERING

We specialize in the design, construction, and maintenance of infrastructure projects such as roads, bridges, tunnels, dams, airports, and buildings. Our services typically include:

ELECTRICAL ENGINEERING:

We specialize in the design, installation, and maintenance of electrical systems for various applications.

1. **Electrical Design:** We design electrical systems for buildings, industrial facilities, and infrastructure projects. This includes power distribution, lighting, fire alarm, security, and communication systems.
2. **Renewable Energy Systems:** We design and install renewable energy systems such as solar photovoltaic (PV), wind turbines, and energy storage solutions.
3. **Power Generation and Distribution:** We work on power generation and distribution projects, including substations, transmission lines, and electrical grids.
4. **Automation and Control Systems:** We develop automation and control systems for manufacturing plants, process industries, and building management systems.
5. **Testing and Commissioning:** We conduct testing and commissioning of electrical systems to ensure they meet safety standards and performance requirements. This involves inspections, functional testing, and documentation of as-built conditions.

1. **Design and Planning:** We design infrastructure projects, considering factors like safety, functionality, aesthetics, and sustainability.
2. **Construction Management:** We oversee the construction process, ensuring projects are completed on time, within budget, and according to design specifications.
3. **Site Development:** We assist with site development for residential, commercial, and industrial projects.
4. **Structural Engineering:** We analyze and design the structural components of buildings and infrastructure to ensure they can withstand loads and environmental conditions. We specialize in areas such as earthquake engineering or bridge design.
5. **Transportation Engineering:** We work on transportation projects such as highways, railways, airports, and public transit systems.

CHEMICAL PRODUCTS

Engages in the production, distribution, and sale of various chemical substances and products. These companies typically operate across a wide range of industries, including manufacturing, agriculture, healthcare, construction, automotive, and consumer goods.

Distribution and Logistics: Managing supply chains to efficiently distribute chemical products to customers, including bulk shipments, packaging, warehousing, and transportation services.

Technical Support and Consulting: Providing technical expertise, training, and consulting services to help customers optimize the use of chemical products, troubleshoot issues, and improve processes.

Environmental and Safety Compliance: Ensuring compliance with environmental regulations and safety standards related to the production, handling, storage, and disposal of chemical substances.

Sustainability Initiatives: Embracing sustainability practices and developing eco-friendly alternatives to traditional chemical products to reduce environmental impact and meet the growing demand for green solutions.

GENERAL SERVICES

We typically offers a wide range of services to meet the diverse needs of businesses, organizations, and individuals. Our services include:

1. **Facility Management:** Providing maintenance, cleaning, security, and other services to ensure the smooth operation of buildings and facilities.
2. **Janitorial Services:** Cleaning and sanitation services for commercial, industrial, and residential properties.
3. **Property Management:** Overseeing the day-to-day operations of residential or commercial properties, including leasing, maintenance, and tenant relations.
4. **Landscaping and Grounds Maintenance:** Maintaining outdoor spaces through landscaping, lawn care, irrigation, and seasonal upkeep.
5. **Security Services:** Offering security personnel, surveillance systems, access control, and other measures to protect people and property.
6. **Catering and Food Services:** Providing catering for events, corporate functions, and institutional settings, as well as vending and cafeteria management.
7. **Transportation and Logistics:** Offering transportation services, logistics solutions, and freight management to facilitate the movement of goods and materials.
8. **Administrative Support:** Providing administrative services such as reception, mail handling, document management, and other clerical tasks.
9. **Waste Management and Recycling:** Handling waste collection, recycling programs, and disposal services for businesses and municipalities.
10. **IT and Technology Services:** Offering IT support, network infrastructure, cybersecurity, software development, and other technology-related services.

Overall, we aim to streamline operations, enhance efficiency, and provide essential support functions to their clients across various industries.
